Shoe Pavillion selects AVE INVESTMENTS, INC for JDA Software / IBM Hardware integration.

Osage, Missouri (March 3, 2008) AVE INVESTMENTS, Inc. has once again proven that having the track record, facilities, skills, experience and value allows smart retailers such as Shoe Pavillion the ability to delegate this responsibility to capable hands.

AVE INVESTMENTS, Inc. will provide the consolidation of Shoe Pavillions' 115 stores of IBM hardware and JDA WinDSS software at the company facility in Osage Missouri. All hardware and peripherals will be unboxed, recorded, assembled and configured for each system. Operating Systems, Utilities, and WinDSS software will be populated and Scripts will be run for each POS terminal. A test and burn in on each device will minimize failures upon installation.

"After 25 years of developing a unique methodology of hardware services", states Ted AveLallement, president AVE INVESTMENTS, " Shoe Pavillion will benefit by using one company that personally takes ownership of the entire project from staging, integration, testing, burn-in, and maintenance. And our flat rate system means that our costs are the lowest in the industry and Shoe Pavillion knows up front what their costs are going to be."
