

posPortable® combines the Intel® Atom™ POSmicro computer, 12 inch collapsible LCD monitor , Epson compatible printer, and POS keyboard with MSR into the steel pcCashdrawer chassis base. An ABS plastic cover with handle is secured to the base. The 40 lb sealed unit is ready for another deployment, storage, or movement to another location.

**AVE INVESTMENTS, INC puts your cash register where the shoppers are....mall kiosks, holiday sales, seasonal stores, or peak locations. Announcing the \$1299.00 posPortable®; the worlds first Intel® Atom™ full function, low power consumption, fanless, complete and portable POS that is self contained and covered for storage or portability.**

**The new posPortable comes with a 3 year overnight replacement warranty.**

OSAGE BEACH, Mo. Business Wire AVE INVESTMENTS, INC proudly announces the new posPortable®. The new posPortable® combines the POSmicro® computer with embedded Intel® Atom™ processor, the 12 inch flat screen monitor, an Epson compatible printer, and POS keyboard and integrates them into the pcCashdrawer steel chassis. All power and cable components are neatly hidden inside the unit. The screen collapses and components are fitted in foam cutouts and a matching ABS plastic cover with handle and latch secures the POS system inside.

“The posPortable has proven its practicality by Hickory Farms. During the 2008 and 2009 holiday season 750 posPortable units are deployed and re-deployed in Hickory Farms Store mall kiosks across the USA malls. AVE Investments, Inc stores them in the off season.” states Ted AveLallemant, President of AVE INVESTMENTS, INC. He further explains, “The new posPortable is smaller and lighter due to integration of the low power consumption, fanless Intel Atom processor. The cover is constructed of ABS plastic which has good resistance to impact, heat, and chemicals.”

Retailers can now place their POS systems in high traffic locations and move them around as needed. The handle makes it easy to carry the 40 pound unit and the secure cover keeps the components, power bricks, and cables protected and together, ready for the next deployment.

Retailers can also rent the posPortable units under a Hardware as a Service annual contract.

The \$1299.00 pcCashdrawer ® includes:

- Intel® Atom™ POSmicro computer inside a steel pcCashdrawer chassis
- 1.6 GHz Processor with up to 2 Gigabyte RAM max.
